OverviewHistoryDesignBattery designs and formatsUsesPerformanceLifespanSafetyA lithium-ion battery or Li-ion battery is a type of rechargeable battery that uses the reversible intercalation of Li ions into electronically conducting solids to store energy. Compared to other types of rechargeable batteries, they generally have higher specific energy, energy density, and energy efficiency and a longer cycle life and calendar life. In the three decades after Li-ion batteries were first sold in 1991, their volumetric energy

The rechargeable lithium-ion batteries market is projected to expand at a CAGR of 7.7% during the forecasted period, driven by innovations in technology and increasing demand across
